

Kenya enjoys boost in tourism

Contributed by

Kenya seems to have recovered from terrorist activity and is now one of Africa's most popular destinations. The Kenyan tourist scene suffered greatly from the bombing of a hotel in Mombassa in 2002 and terrorist attacks on the US embassy in Nairobi in 1998. The situation has been further hindered in recent years by the lack of sufficient facilities and bad roads in and around Kenyan national parks. However, as the memory of terrorist attacks dwindles, the roads are being repaired and more and more tourists are coming to Kenya with stacks of much needed cash. Most of the visitors arrive from the UK, US, Japan, Germany and the new and hugely important market of China.
